Name: _____

Date: _____

Rolling Dice - 1 D6

Take a single six-sided die. If you roll the die 100 times, how many times do you expect to roll a 1? How many times do you expect to roll a 2? How about a 3, 4, 5, or 6?

Make a chart to record your results. Do this experiment, and record your results. How closer were your actual results to your predictions?

Show your work, and write your answer in a complete sentence.
