Name: _____

Date: _____

Square Ages

Think of someone in your life who's a fair bit older than you - a parent, guardian, grandparent, aunt, or uncle for example. At some point in your life, your age will be the square root of that person's age.

Has this already happened? How old were each of you when it happened?

Will this happen in the future? What age will you each be when it happens?

Show your work, and write your answer in a complete sentence.
